**DETAILED ACTION**

***Election/Restrictions***

1. The applicant's election of claims 1, 3, 5, 6, 8-18, 24, and 25 was received 4/21/03. Currently, claims 1, 3, 5, 6, 8-18, 24 and 25 are pending, claims 2, 4, and 7 are canceled, and claims 19-23 are withdrawn from further consideration.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 9 and 17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 9 and 17 state the sealing member is a valve, while claim 1 claims the valve and the sealing member as distinct elements. The drawings reflect the valve and sealing member as being two separate elements. Applicant is advised to amend claims 9 and 17 to recite the sealing member contains a valve.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 3, 5, 6, 8-18, 24 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The applicant has not clearly and distinctly labeled the parts

Art Unit: 3731

of his invention. The applicant must be consistent in the nomenclature of the parts in the specification and the claims. Many of the names of the elements claimed are not disclosed in the specification. For example there is no mention of an 'opening/closing valve' in the specification. There is also no 'hole diameter changeable member' or 'port' disclosed either. The applicant addressed the lack of support in the response to the first Office action, however, the applicant must amend either the claims or the specification to make the nomenclature of all the parts consistent throughout the application.

### *Conclusion*

If applicant has questions regarding the USC 112 rejections, the applicant is advised to contact the examiner by phone prior to responding to this office action.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
